

Week 6 Contribution – 28/3/21

- Emanuel Kindaro
- 13188634
- GitHub Username: UnitedEK

UI/UX – Contributed to following designs:

Research:

Automating tests - GitHub Actions

Tests are an important part of any project that allow us to make sure we're not breaking existing code while we work. Github makes it really easy to get this workflow started as it comes as one of their pre-baked options.

Automated testing will be setup using the following article as a guide:

<https://www.freecodecamp.org/news/what-are-github-actions-and-how-can-you-automate-tests-and-slack-notifications/#part-1-automating-tests>

UI/UX Libraries & Packages Potentially Will Be Used

- SweetAlert
<https://sweetalert2.github.io/>
- iziModal.js
<https://izimodal.marcelodolza.com/>
- node-2fa
<https://www.npmjs.com/package/node-2fa>

Setup 2FA Functionality Using the Following Article as a Guide
